Flatiron School – Seattle, WA
Immersive Full Stack Web Development

North Seattle Community College – Seattle, WA
Web Applications Technologies Certificate

University of Central Florida – Orlando, FL
B.S. Marketing

TECHNICAL EXPERIENCE

Shyft Technologies, Backend Engineer

I work closely with PM's and QA to design and implement new features and API's rapidly. Our main projects include enterprise customer integrations and new feature implementations using Ruby on Rails, Postgres, Azure along with Bosh for deployments. I regularly work with mobile (Xcode & Android Studios) as well as front-end technologies (Javascript & React) for testing our newly created API endpoint or integration. All new features deployed are accompained by Rspec test cases.

Flatiron School, Immersive Web Development

Worked solo and in a collaborative environment using Ruby on Rails, React, Javascript and MySQL to create web applications and deployed projects to Heroku. To interact with projects created at Flatiron visit my portfolio at jesspoe.com Studied computer programming algorithms and best practices as well as competed in Fintech hackathon.
